Also, the value of the Portfolio investments may be affected by interest rates, currency exchange rates, changes in law / policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual Securities, a specific sector or all sectors.

Additionally, the liquidity and valuation of the Portfolio due to its holdings of unlisted Securities may be affected if they have to be sold prior to the target date of disinvestment.

- (xi) The investment according to investment objective of a Portfolio may result in concentration of investments in a specific Security / sector/ issuer, which may expose the Portfolio to risk arising out of non-diversification. Further, the portfolio with investment objective to invest in a specific sector / industry would be exposed to risk associated with such sector / industry and its performance will be dependent on performance of such sector / industry.
- (xii) The arrangement of pooling of funds from various Clients and investing them in Securities could be construed as an 'Association of Persons' (AOP) in India under the provisions of the Income Tax Act, 1961 and taxed accordingly.
